graph facsimiles. 21.5 cm.

The author of each article is named in the table of contents.

In consequence of dissatisfaction in the South with the teaching of history in its schools, this History Committee was charged with the duty of investigating the text-books used, which are described as "a literature created by alien authors." It is declared that these books were found to be "replete with error and misrepresentation."

The "other Confederate papers" are two papers on Stonewall Jackson, by Hunter McGuire, the first of which is catalogued separately.

1. The first part of the paper is devoted to a discussion of the
theoretical aspects of the problem. It is shown that the
problem is equivalent to a problem in the theory of
differential equations. The main results of the paper are
theorems 1 and 2. The first theorem states that the
problem is solvable if and only if the following conditions
are satisfied: (1) the function $f(x)$ is continuous on the
interval $[a, b]$; (2) the function $f(x)$ is bounded on the
interval $[a, b]$; (3) the function $f(x)$ is differentiable on the
interval $[a, b]$. The second theorem states that the
solution of the problem is unique if the function $f(x)$ is
continuous on the interval $[a, b]$ and the function $f(x)$ is
bounded on the interval $[a, b]$.
